TDL PRESENTATION

By Leaf Cooper

Approach

- Circumstance meant some elements of project were unknown at outset
- Divided project into mostly independent sections to work on
- Once new elements and requirements became known, could begin work on those sections

Sprint overview

- Single sprint covered entire project
- Covered creation of frontend, backend, testing and documentation
- Hoped to achieve minimum viable product of CRUD functionality

Technologies used

- Front end: HTML, css, JavaScript
- Backend: Java, SQL, Maven, SpringBoot
- Testing: JUnit, Mockito, SonarQube
- Version control: Git, Github

Testing

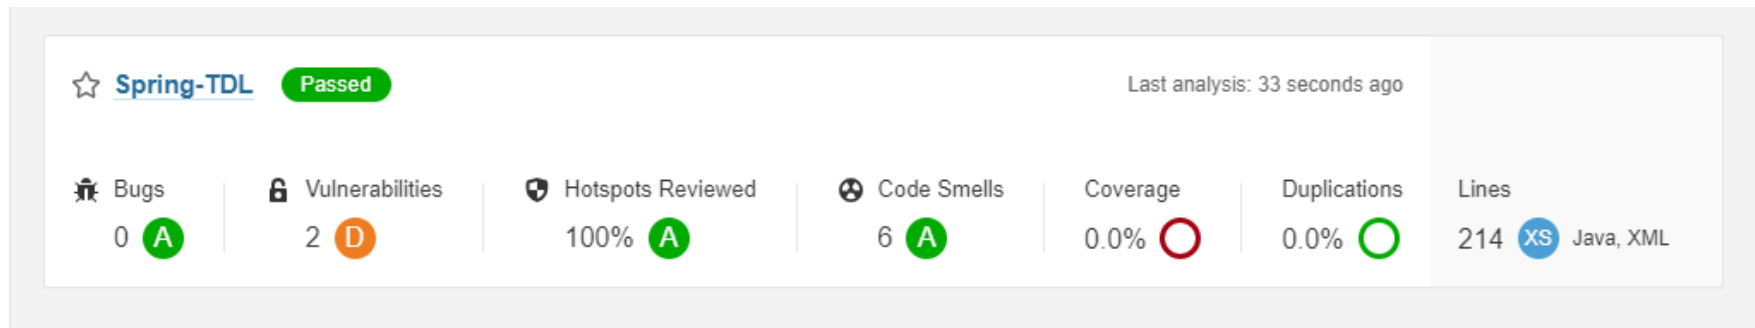

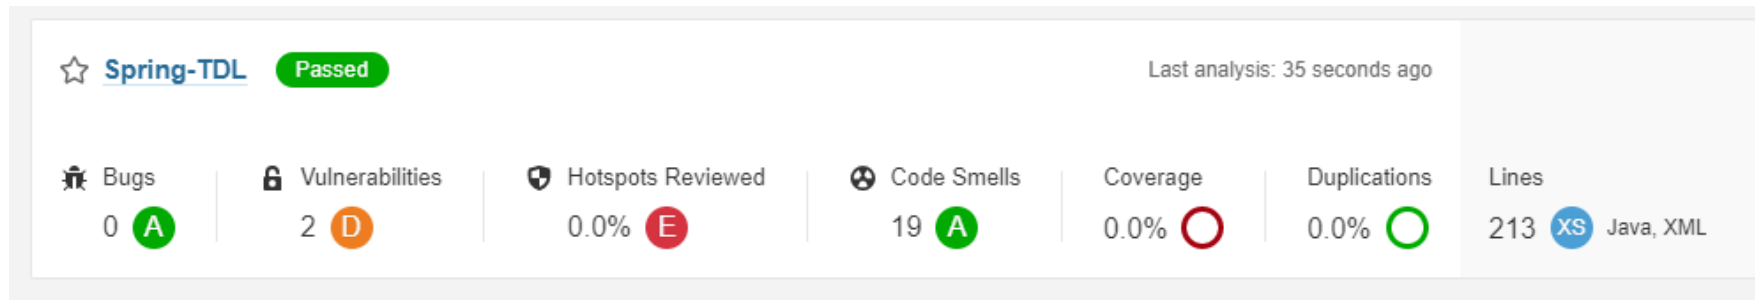

- Unit testing and integration testing was carried out to ensure functionality
- Aimed to meet 80% coverage with no test fails

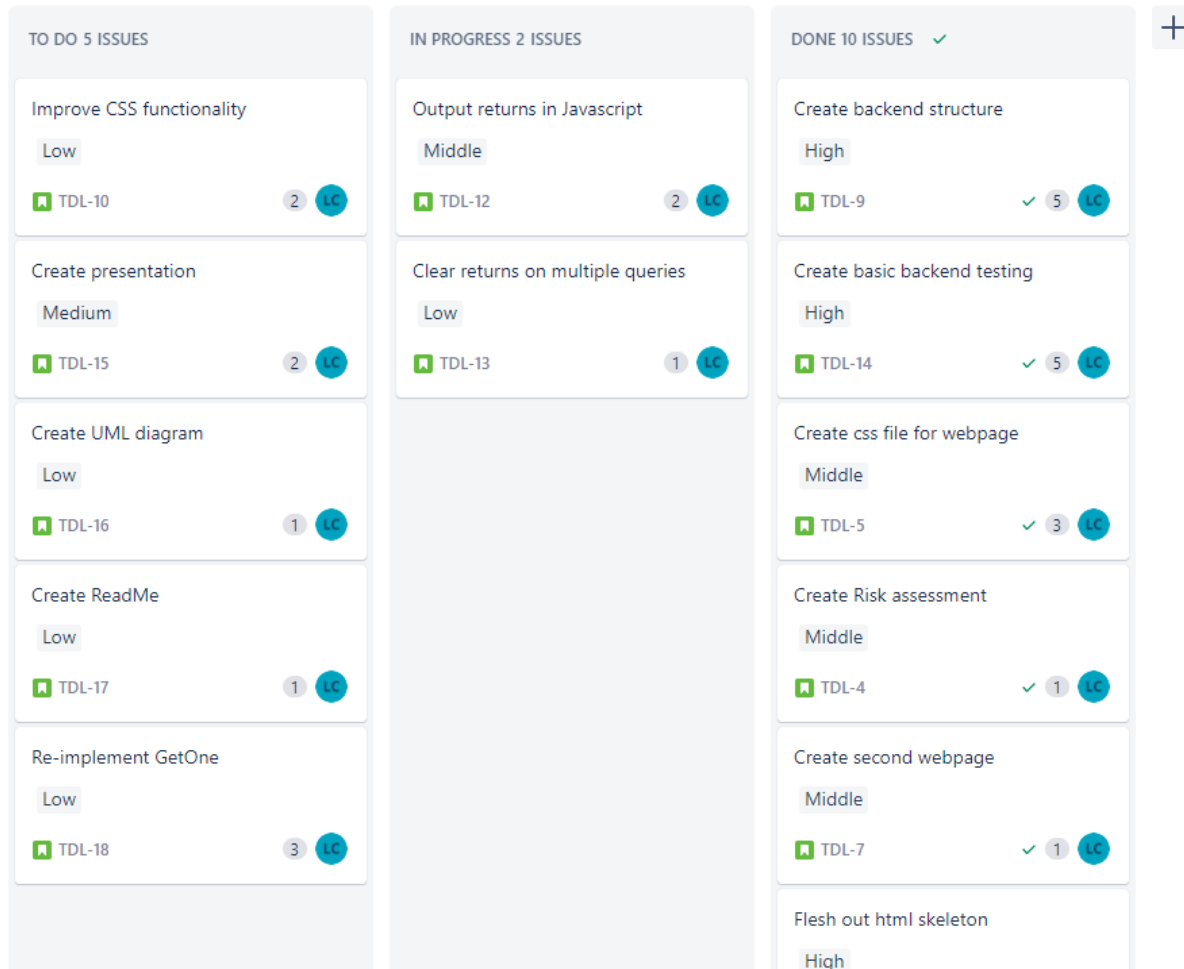

Element	Coverage	Covered Instructions
Spring-TDL	99.1 %	536
src/main/java	97.5 %	192
com.qa.SpringTDL	37.5 %	3
com.qa.SpringTDL.domain	100.0 %	58
com.qa.SpringTDL.rest	100.0 %	84
com.qa.SpringTDL.service	100.0 %	47
src/test/java	100.0 %	344

Testing

- Additionally, used SonarQube for static analysis

User stories

User Stories

 Add epic /  TDL-5

Create css file for webpage

 Attach  Add a child issue  Link issue  

Description

As a user, I want the webpage to be aesthetically sensible and well structured so that I will be able to easily view and interact with elements

User Stories

 Add epic /  TDL-19

Set requirements for data entry, e.g. name is required

 Attach  Add a child issue  Link issue  

Description

As a developer, I want to ensure that relevant fields have requirements for entry, so that the data remains well structured and readable

 Configure

Sprint review

- Satisfied with quality of sprint
- Able to complete MVP and a few additional features
- Only remaining stories were low priority additional features

Sprint Retrospective

- Satisfied with overall pacing of work, able to prioritise well and adjust to new/changing requirements
- Could improve on Github interactions, early errors with repository left me cautious of some beneficial features
- Could also further improve CSS and overall design of webpage

Conclusion

- Satisfied with status of project
- Future steps may include completing remaining user stories, improving webpage, introducing extra features

A vertical bar on the left side of the slide with a gradient from orange at the top to purple at the bottom.

THANK YOU

Any questions?
